On the go real-time access via SmartPhones and Mobile Phones. With mobile web and Mobile Device applications for Blackberry, iPhone and Android.

TRIGGERS & ALERTS

Track notifications and alerts to ensure timetables, course work and important dates are met.

AcumenMobile 3.0

Mobile Education Platform

Mobile Platform

AcumenMobile 3.0 delivers a secure and reliable Mobile Platform for education and learning institutions delivering educational, content, news, timetables and tests to Mobile Devices.

Utilising the proven, secure and reliable AcumenMobile Software, the AcumenMobile Mobile Education Platform delivers best practice mobile ICT capabilities for students and teachers across multiple Mobile Devices and operating systems.

Fully Managed

AcumenMobile Mobile Education Platforms are deployed as fully hosted, secure managed applications - enabling access via desktop web browsers, mobile device web browsers and device specific apps for iPhone, BlackBerry and Android.

Multi Capability

AcumenMobile's Mobile Education Platform can be deployed as (1) A fully integrated plugin with most Virtual Learning Environments or (2) As a standalone application to deliver mobile ICT capabilities.

1. VLE Integration

Integrate with existing VLE environments to deliver true mobile access to VLE content from any location and web enabled Mobile Devices. Key features include:

- ◆ Enabling access to VLE content from Mobile Devices and SmartPhones.
- ◆ Remote assessments and testing with results fed direct to the VLE database.

- ◆ Delivering video, text, documents and presentations to students from any location.
- ◆ Controlling access to content through existing role and permission rights.
- ◆ Tracking content access with ease through a dedicated report facility.

2. Standalone Mobile ICT

Utilising the flexible and secure AcumenMobile platform, schools and colleges can, from any location, device or desktop computer deliver mobile ICT capabilities across key areas of the educational curriculum. Key features include:

- ◆ Publishing timetables and schedules to Mobile Devices and SmartPhones for ease of access for students and parents.
- ◆ Managing work plans and publishing important dates for students and parental mobile access.
- ◆ Enabling the uploading of content direct from Mobile Devices to secure Virtual Workspaces on field trips and out of classroom work.
- ◆ Enabling students to submit work from any location or device quickly and securely.
- ◆ Managing group work via Virtual Workspaces for anywhere, any time team working.
- ◆ Publishing student feedback, results and newsletters to ensure ease of access when required.

Modular Based

At the heart of the AcumenMobile Mobile Education Platform is the ability to deploy the platform modules in a flexible on-demand approach to ensure you only use / pay for the areas you need. Simply deploy the modules
