This case study details a secondary school utilising AcumenMobile 3.0 as a centralised messaging and communications platform for pupil progress reporting and resource access.

AcumenMobile 3.0

AcumenMobile 3.0 is a flexible document tracking, messaging and collaboration platform which is delivered as a 'Software as a Service' application from a dedicated, secure, host website at <https://www.acumenmobile.com>.

Case Study

Secondary school utilises AcumenMobile 3.0 to deliver messaging and communication capabilities to parents and guardians.

With over 2000 pupils, King Edwin's School have for many years faced an expensive and time consuming ongoing activity to deliver progress reporting and timetable updates to parents and guardians. This activity normally occurs via manual paper processes. As a value add, King Edwin's School also wanted to ensure pupils could access timetables and schedules at home or outside of school. However, King Edwin's School did not want to utilise their existing email infrastructure to deliver these capabilities due to cost and scalability of including parents / guardian email accounts.

Utilising AcumenMobile as a core platform King Edwin's School was able to deploy new ICT capabilities to enable a seamless and user friendly

solution for these problems. Essentially AcumenMobile 3.0 capabilities would allow the school to deliver:

- ▶ Virtual workspaces for pupils to upload and download content from any location. Thereby enabling the viewing of timetables and schedules from any location.
- ▶ A messaging platform to allow the school to send out electronic communications, messages and reports to parents / guardians about their children's progress and reports.

With these capabilities onboard, King Edwin's School is able to send messages to parents and guardians at regular intervals without the costs involved in printing and distribution – AcumenMobile 3.0 sends the messages direct to a secure web space for private access.

Pupils can now upload and access timetables and content from any location or device – including mobile devices. Due to AcumenMobile 3.0 fully hosted service, King Edwin's School was able to deploy AcumenMobile 3.0 to all required parents within 30 days.

Key Benefits

There are a number of key benefits for any school or college using AcumenMobile 3.0, including:

- ▶ Sending secure messages and information to parents and guardians via a dedicated web space.
- ▶ Tracking the reading and downloading of messages and documents.
- ▶ Reducing costs involved in producing printed messages and communications.
- ▶ Reduction in cost associated in maintaining expensive email-based messaging tools.
- ▶ Reduction in time and costs of employees having to access documents through manual processes.
- ▶ Reducing costs by enabling staff to access, share and collaborate safely and securely.
